Ambo University which was founded in 1939 is one of the oldest higher learning institutions in Ethiopia. The primary objective of the University is to promote and advance academics, knowledge and skills in all aspects of Sciences and sustainable developments in Ethiopia. This it does by publishing the **JSSD, Ambo Uniforum Newsletter, various books and proceedings**. Frequent meetings are held and training courses are organized. International conferences, workshops are also held at least once every year. Financial support for various researches is provided through the ministry of education funds and other external funding agencies. Through these publications and meetings, the University strives to contribute to better understanding of new and available technologies at local, regional and international level.

Ambo University is responsible to promote quality academics through advising in institutions of higher education and is dedicated to support professional growth of academics and researches through its various publications, conferences, institutes, and other development organs. It provides a forum of discussion, debates, and the exchange of ideas regarding the role of academic advising in all its schools, colleges and departments.

Ambo University, therefore, would appreciate and acknowledge all article contributors, financial assistant providers, and moral supporters for the publication of this imperative journal.

The current, biannual journal and newsletter exists to advance scholarly discourse about the research, theory, and practices of academics in the University. The journal considers articles from a wide variety of interest areas and from a wide spectrum of disciplines. Manuscripts are typically reviewed within two-to three months of submission. It is not possible to promise automatic acceptance of the manuscript. Based on the reviewers’ comments, the Editorial Board deserves the right to reject manuscripts that are not to accepted standard. However, constructive comments can be given for future improvements.
JSSD: Journal of Science and Sustainable Development

JSSD is an international, a bi-annual, Journal of Ambo University, Ethiopia. The Journal was launched in 2012. The journal is designed for an international readership both within Africa and Overseas. The JSSD will accept for publication original research articles, review articles, short communications and features articles in both basic and applied sciences. The journal covers all disciplines which are highly relevant to Ethiopia and other countries sustainable developments through the development of academic aspects. Therefore, Ambo University is open to invite all suitably qualified individuals and organizations to contribute research articles in all areas of your interest based on the guidelines of the publications. Research manuscripts in Science, Academy, Technology and other related disciplines will be considered for the publication in the JSSD.

OBJECTIVES:

- To produce a publication that is credible and informative which will serve as a medium for professionals in science and related fields to interact and share information and knowledge for the purpose of the advancement of the scientific community and sustainable development.

- To promote the effective teaching of science, technology and management; identifying problems and developing solutions through dissemination of new information from researches align in the direction of solving basic need of the country.

- To contribute to the pool of scientific information by providing (creating) more access for researchers to have their original scientific work relevant to the need of the country and the world at large.
INFORMATION TO SUBSCRIBERS

Subscription rates for one year (two issues), including airmail, are as follows:

INSTRUCTIONS TO AUTHORS
JSSD publishes original papers in all fields of research in science and development including technology, environment, biological, social, medical sciences and all related disciplines. Acceptance of papers is at the discretion of Editorial committee, which is assisted by international, regional and local reviewers. Intending contributors should comply with the “instruction to authors” published in each volume. Manuscripts must be in English. Submission of a manuscript to the Journal must be accompanied by a letter stating that no similar paper, other than abstract or an oral presentation has been or will be submitted for publication elsewhere. The editorial committee reserves the rights to edit all manuscripts as it deems fit.

Papers are judged on their scientific content, accuracy and clarity by at least two referees from a panel of distinguished reviewers of the journal. Authors are asked to pay special attention to the instructions given below for preparation of manuscripts. Failure to do so may cause undue delay in publication or rejection of manuscript.

1. Manuscripts should be typed on one side only, double spaced, on an A4 (210x297mm) size paper with wide (25mm) margins all around, with font size of 12 in Times New Roman.

2. Three copies of manuscript, including the original, together with tables and illustrations should be submitted. Each page of the typescript must be numbered. Authors are advised to keep a fourth copy for their own use. All copies should be carefully checked and any corrections clearly indicated. It is also possible to use internet and online submission.

3. Manuscripts in fully corrected, final form should be sent via internet (soft copies) or post office to:

   Chief Editor:                      Email:
   JSSD
   Or
   P. O. Box 19
   Ambo University, Ambo, Ethiopia

4. Where a paper has joint authors, one author must accept responsibility for all correspondence and it should be indicated by an asterisk. If an author has received no response on his paper three months after the date of acknowledgement of its receipt, he should write to the Chief Editor.

5. Papers should be organized in the following manner:

   A) **Title:** the title should be a brief phrase describing the contents of the paper. The title page should include the authors’ full names and affiliations, the name of the corresponding author along with phone, fax and E-mail addresses or information. Address of the institution in which the research was carried out should also be included. A running title of not more ten words should also be supplied.
B) The first page should also contain the Abstract.

The abstracts should be informative and completely self-explanatory, briefly present the topic, state the scope of the experiments, indicate significant data and point out major findings and conclusions. The abstract should condense the paper in 250 words in length. The abstract should be intelligible on its own. Avoid abbreviations and statements such as “the results obtained were discussed in the paper”. Instead, include the highlights of the results in the abstract. Complete sentences, active verbs, and third person should be used and the abstract should be written in the past tense. No literature should be cited. Three to five Key words in alphabetical order should be given next to the abstract in a separate line.

MAIN BODY OF THE MANUSCRIPT:

The paper should be divided into sections such as INTRODUCTION: giving a description of the problem and its relation to other works in the same field. The OBJECTIVE(S): of the investigation should also be stated in this section. Abbreviations should be put under the introduction in a separate paragraph. The remaining section can be then covering MATERIALS and METHODS, RESULTS & DISCUSSION, CONCLUSION, ACKNOWLEDGEMENT (if any) and REFERENCES.

Tables should be typed in numerical order, individually on separate sheets. A table should be self explanatory without reference to text and should have a clear and concise title. Avoid abbreviation such as dots and dashes in the table. Do not duplicate results presented in tables in other forms such as graphs or charts; select one form which is most appropriate.

Illustrations in color, if essential, will be accepted on condition that the author bears the extra cost involved. Do not submit illustrations larger than 150x280mm. Photographs should be in black and white, of good contrast and on glossy paper.

Black and white drawings including graphs should be in Indian inks or equivalent on white card or on drafting film. All illustration should be given separately, not stuck on pages and not folded. They should be numbered as figures in sequence with Arabic numerals. Each figure should have a descriptive legend and this should be given on a separate sheet after the manuscript. Clear, glossy black and white photographs (100x70mm) can be submitted to the Journal. They should clearly number on the back in pencil. Lines, letters and numbers should be clearly drawn giving due attention to reduction by the printer. Letters and numbers should be 1.5mm tall when reduced. Indicate magnification of illustrations when necessary. A scale incorporated in the drawing is a satisfactory method. Authors wishing to borrow published illustration should obtain prior permission to reproduce before submitting the manuscript.

Only international systems of units (ST) are acceptable. Symbols and nomenclatures should conform to international recommendations with respect to specific fields of specialization.

Only publications cited in the text should be clearly given in the references. All literature cited should be closely relevant to the author’s work. Exhaustive lists should be avoided. Unpublished
data should not be cited. Personal communications, although not encouraged, may be cited when essential to the text.

**Give references in the text as follows:**

In the text, a reference identified by means of an author’s name should be followed by the date of the reference in parentheses. When there are more than two authors, only the first author’s name should be mentioned, followed by *et.al.*,

Workeneh (2011), Mulugeta *et al.*, (2010), (Hussen & Getachew, 2005), Ulfna (2000a), Ulfina (2000b), Shiferaw (2006a, b); (Tan, 1978); Tan (1978); (Lim & Aziz, 1979); Lim and Aziz (1979); (Tan *et al.*, 1979)

Reference should be listed at the end of the paper in alphabetical order. Journal names are abbreviated. Authors are fully responsible for the accuracy of the references. In the list of references, literature cited should be arranged alphabetically according to the author’s name. The author’s name, in upper case, should be followed by the year of publication before full stop.

Title of periodicals and books should be given in full. In the case of books, indicate the place of publication and publisher, and edition if more than one exists.

**Examples:**

**Journal articles:**

**To cite some pages in a publication prepared by one or more editors, an acceptable format is:**

**Articles written in other languages**

Articles written in languages other than English should be written in full in their Romanized form.

**Books**

Edited Works

Patents

Personal Communications

Proofs and Reprints:  Electronic proof will be sent (e-mail attachment) to the corresponding author as a PDF file. Page proofs are considered to be the final version of the manuscript.

Copy right: Submission of a manuscript implies that the work described has been published before; that it is not under consideration for publication elsewhere. If the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher. All ethical issues which must be taken into account should also be considered.

Fees and Charges: It is Free of Charge
COLUMNS

Original Research Articles

Report of original research in any branch of science will be considered for publication in this section.

Review Article

Covering recent advances in an area in which an author has been actively engaged will be published under this column.

Short Communication

News of interest to researchers including progress report on ongoing researches, records of observation- short comments, correction and reinterpretations of articles previously published in this journal will be dealt with. Manuscripts submitted for this column should be prepared following the preceding instructions, and should not be more than six pages and should not contain more than two figures and/or two tables.

Feature Article

These are articles may cover a range of topics in science, education and science and society.

➤ Science Education

Articles related to science education in schools and colleges, new or simple methods of scientific experiments for science education, discussion of science curricula textbooks, teaching aids and etc.

➤ Science and Society

Articles related to application of science to solving daily problems of human; the scientific methods as applied to solving human’s problem; the role of science experiments in the third world and etc, are considered in this column.

Book Review

A critical evaluation of recently published books in basic science, science education, technology and development will be published under this column.
